

The READI Platform

An Identity Automation Platform. Agile Approach.

READI for Agile Identity

The READI platform is purpose-built to extend automation for identity with an Agile Identity (iterative) approach. The READI Platform provides organizations with the framework to automate identity tasks easily, iteratively, and with the skillset your team already possesses. Agile Identity is based on Agile Software Development and Project Management Principles, emphasizing rapid deployment, adaptability, and leveraging existing organizational resources. READI uses the READI Platform to develop core applications, and we make the READI Platform framework available to extend and enhance your current Identity Solutions and processes.

Familiar tools. Faster results

Bot Studio uses PowerShell—skills your team already has—to build centralized, reusable, governed scripts. Get up and running with little to no learning curve.

Flexible access to identity data

Identity data lives in the READI Platform or is retrieved on demand from any app or system, giving you the control and context needed for policy enforcement and decision-making.

Dynamic user interfaces, built automatically

READI dynamically generates adaptive UIs based on your BOT's input needs—no manual UI building required. Create sophisticated interfaces with custom forms and options.

API-ready, by default

Every BOT supports REST, enabling real-time triggers from other applications—no more waiting on batch jobs or manual intervention.

Credential management built in

Use our secure vault or integrate your own to eliminate exposed credentials. Every BOT is sealed with code-signing technology.

Delegation made easy

Assign Bots to people or processes. Delegate execution to team members while maintaining control.

Audit-ready logging and alerts

Track every action with centralized logging and custom alerting. Maintain compliance and visibility at every step.

Real ROI, in real time

Measure automation impact with ROI metrics tied to your actual internal costs. Prove the value READI delivers.

Make your Identity Management or Service Desk Solutions better. READI provides the automation you need.

An Identity Automation Platform Built Differently

READI provides all the components needed for both simple and complex automation.

Why the READI platform is the best choice for identity automation?

Keep your process. Automate the rest.

Make what you have repeatable, reliable, and secure—without disrupting what works.

Skip the compiler. Build with low-code.

Extend IGA and ITSM safely. Your team can create Bots using the skills they already have. No heavy code required.

Connect freely, everywhere.

Cloud, on-prem, custom apps—connect without usage or per-connector fees.

Built-in security, real-time control.

From first command to execution, automation stays compliant and secure—even as things change.

Identity first. Enterprise ready.

Start with identity. Expand to everything else. The READI platform scales with your needs.

The READI Architecture

READI is a cloud-native true microservices SaaS platform introducing no admin overhead when deploying new product updates. We take care of everything for you. Our architecture provides infinite scalability with global access. Built on the Microsoft Azure platform, the READI platform's elastic architecture allows you to automate any workload without limits. READI provides out-of-the-box connectivity to core systems, and on-prem agents allow us to easily ingest legacy application data/legacy systems.

Automate any Identity task in your organization.
You're only limited to your imagination.

We were amazed at how quickly we could automate our identity processes with READI."

— JP Calabio, CISO | Alorica

Customers have built hundreds of automations to solve their unique business challenges in a very short timeframe. Alorica was in production within 45 days and experienced \$100K's in savings. They are not unique – all our customers have experienced the ability to rapidly create automations for their immediate issues and identify additional challenges in their organization to solve with READI automation.

About READI

READI is an industry leader in Agile Identity. READI changes the game from a traditional waterfall approach by building identity on an automation platform. READI allows organizations to focus on specific pain points with a start anywhere and go anywhere agile approach. READI has the tools to transform manual processes into efficient and secure automations. An enterprise-integrated solution delivered incrementally for maximum value.
